

Apprentice - Roofing/Construction (Tualatin, OR)

Columbia Roofing & Sheet Metal is an industry leader with over 20 years' experience. We are seeking a Commercial Roofing Apprentice to join our talented and growing team of roofing professionals. We are a tight-knit and supportive work culture looking for individuals who are motivated and thrive in a team environment.

We offer competitive pay with project bonus potential, health insurance, a competitive retirement package, and a supportive and safe work culture. Employee referral bonus for additional crew members.

No matter your skill level we have room to grow, ask us about your career path at Columbia Roofing and Sheet Metal and Columbia University

Preferred Knowledge, Skills and Abilities:

- Perform all areas of the roofing project including tear off, lay out of project, staging of materials, destruction and installation of roof material, and some detail work with specific direction from Foreperson in a safe and timely manner.
- Perform roof installation and detailed roof installation procedures to manufacturer's specifications.
- Monitor jobsite's cleanliness and security of materials, tools, equipment and roof structure throughout all stages of the project.
- Maintain and communicate a safe working environment.
- Learn new or existing roof installation techniques and safety procedures.
- Ability to use various roof equipment including ladders, heat guns, automatic welders, screw guns, roof warriors, and roof saws.
- Ability to use various roofing tools including hammers, tape measures, screw drivers, tin snips, utility knives, roof hatchets, crowbar, pliers, whole saws, seam probes, hand brakes and crescent wrenches.
- Ability and willingness to learn and train others with new technical skills.
- Ability to engage in continuous physical activity including climbing, balancing, stooping, kneeling, crouching, crawling, reaching, standing, walking, pushing, pulling, lifting, fingering, and grasping.
- Ability to engage in heavy work conditions, including exerting 75 + pounds of force occasionally and 20 + pounds of force constantly to move objects.
- Good decision-making skills and judgment relevant to work related issues.
- Mental ability to assist Foreperson in managing job operations

Desired Experience: (We will train the right candidate)

- 3-5 years of experience installing and destructing roof systems.
- 2+ years on the job training in either cold process or single ply composition, shake, and shingle roof systems.
- Basic safety training for roof installation and destruction.

Columbia Roofing & Sheet Metal encourages a drug free work place.

**Applicant must pass Drug Screen and Background check.
Position may require some evenings, weekends and overtime.**
